

Wehrmann analyses your demand and finds the best solution <<<

We look forward to present the **„Point“ on the 18. - 20. November** in Barntrup and would be happy to arrange an appointment for you.

„POINT TO POINT“ BORING MASCHINE

THE INTELLIGENT SOLUTION AT THE RIGHT PRICE

CNC controlled point to point boring machine with through feed panel boring from the bottom and automatic panel return to the operator. POINT is the affordable automatic thru-feed drilling machine that combines flexibility and high productivity.

Advantages

- Three controlled axes
- Double „0“ panel reference
- Constant side pusher
- No limits in panel length
- No tool changing
- Ideal for batch 1 piece
- Boring from Bottom

It is ideal for for companies who need an automatic solution for drilling processing with low investment.
